

REXFOUNT

Fountain Solution

REXFOUNT is a fountain solution for use on webfed printing presses and sheetfed printing presses.

REXFOUNT is a fountain solution concentrate with gum added. It does not contain bichromates.

REXFOUNT enhances ink water balance even at high-speeds providing clean and sharp printing results.

REXFOUNT reduces plate oxidation, foaming, alcohol consumption, bacteria or fungus and image growth.

REXFOUNT is compatible with all types of dampening systems.

Usage: 2~3% according to water hardness. With unusual reverse or problem inks, add REXFOUNT as necessary.

Packaging: 1 US gallon (3.785 liters)
25 liters gallon
