

AUTOWASH

Washing Solution

AUTOWASH is a washing solution for rollers and blankets suitable for use on webfed printing presses and sheetfed printing presses distinguished by excellent ink solvency.

AUTOWASH is formulated using a unique blend of solvents in order to deliver a fast and strong cleaning power.

AUTOWASH does not contain water but it is water miscible and readily mixes with water to remove all residues on rollers and blankets. It is especially effective in removing all type of glazing and paper lints.

AUTOWASH is not suitable for use on rollers and blankets in UV printing.

AUTOWASH contains a low level of aromatics.

Usage: Blankets: **AUTOWASH** can be used with up to 20% water.
For manual use, use as is or with water and apply with a wash-up cloth.

Rollers: Use as is or with 10~20% water.

Packaging: 25 liters gallon
200 liters drum
